

# **Nadcap recognises Alloy Heat Treatment for its superior performance and commitment to continual improvement in aerospace quality**

---

Alloy Heat Treatment announces that it has been awarded Nadcap Merit Status for Heat Treating.

Mr Adrian Church, managing director at Alloy Heat Treatment (AHT) expressed his delight at once again meeting the stringent criteria set out by Nadcap, to allow them to gain merit status. Mr Church said: "It can only be credited to the investment, expertise and dedication of the whole team at AHT."

Alloy Heat Treatment has held Nadcap accreditation since 2004. Having demonstrated their ongoing commitment to quality by satisfying customer requirements and industry specifications, the Nadcap Task Group has determined that Alloy Heat Treatment has earned special recognition. This means that, instead of having their next Nadcap audit in twelve months, Alloy Heat Treatment has been granted an accreditation that lasts until January 2018.

Achieving Nadcap accreditation is not easy: it is one of the ways in which aerospace industry identifies those who excel at manufacturing quality product through superior special processes. Companies such as Alloy Heat Treatment go above and beyond achieving Nadcap accreditation to obtain Merit status and they should justifiably be proud of it," said Joe Pinto, Executive Vice President and Chief Operating Officer at the Performance Review Institute. "Benefitting from a less frequent audit schedule reduces audit costs and associated pressures and demonstrates the trust that the aerospace industry has in Alloy Heat Treatment, based on their past performance in Nadcap audits. PRI is proud to support continual improvement in the aerospace industry by helping companies such as Alloy Heat Treatment be successful and we look forward to assist the industry moving forward."
